Yazan Mashaqbeh

Cybersecurity Graduate | SOC Analyst
Candidate

PROFESSIONAL SUMMARY

Cybersecurity graduate from The Hashemite University (July 2026) with hands-on experience in network security, security operations, and secure mobile development. Achieved the CompTIA Security+ (SY0-701) certification on the first attempt with a score of 782/900. Developed an anti-phishing mobile application as a graduation project using Flutter/Dart, designed to protect non-technical users from phishing and online threats. Ready to bring both academic grounding and practical lab experience to an entry-level SOC Analyst or Security Analyst position.

EDUCATION

The Hashemite University -- Amman, Jordan
Bachelor of Science in Cybersecurity
Graduated: July 29, 2026

CERTIFICATIONS

CompTIA Security+ (SY0-701)
CompTIA | June 2026 | Score: 782/900 | First Attempt
> Network Security -- Threats, Vulnerabilities & Mitigations
> Identity & Access Management, Security Architecture & Design
> Security Operations & Incident Response

Cisco Networking Academy -- Cybersecurity Course
Cisco | Completed May 2026

Networking fundamentals, security concepts, and cyber threat defense strategies.

CYBERSECURITY PROJECTS

Anti-Phishing Mobile Application
Graduation Project | Flutter / Dart | 2025-2026
> Designed and developed a cross-platform app to shield non-technical users from phishing and cybercrimes.
> Built real-time URL scanning and detection logic to alert users before engaging with malicious links.

> Applied threat modeling, input validation, and secure REST API communication across the full application.

> Ran user testing sessions with non-technical audiences and refined UI/UX based on collected feedback.

Active Directory Home Lab

Personal Lab | 2024-2025

> Configured Windows Server Active Directory in VirtualBox/VMware; managed users, OUs, groups, and GPOs.

> Simulated real-world attacks (credential abuse, privilege escalation) and practiced detection and remediation.

Network Traffic Analysis

Personal Lab | 2024-2025

> Captured and analyzed live traffic with Wireshark and Nmap across TCP/IP, DNS, HTTP/S, and ARP protocols.

> Documented anomaly findings and proposed mitigations, building strong packet-analysis and SOC investigation skills.

ADDITIONAL ACTIVITIES

Independent Content Creator | Game

Development & 3D Art

YouTube Channel | Ongoing

Produces and publishes technical content covering Unreal Engine 5 game development and Blender 3D modeling. Manages the entire production pipeline independently -- concept, scripting, recording, editing, and publishing. Demonstrates strong self-direction, technical curiosity, and the ability to independently master complex creative tools.
